PROFESSIONAL SUMMARY

Information Technology graduate and Data Analyst with hands-on internship and training experience in EDA, data cleaning, and business intelligence reporting. Proficient in SQL (MySQL, PostgreSQL), Python (Pandas, NumPy), Power BI (DAX, Power Query), and Advanced Excel. Experienced in querying relational databases, building interactive KPI dashboards, and translating business metrics into actionable insights. Applies Machine Learning (Scikit-learn) as a supporting analytical capability.

TECHNICAL SKILLS

- **Programming & Databases:** SQL (MySQL, PostgreSQL, CTEs, Window Functions), Python (Pandas, NumPy, Matplotlib), RDBMS, Data Modeling
- **BI & Visualization:** Power BI (DAX, Power Query, Star Schema), Advanced Excel (Pivot Tables, XLOOKUP, Dynamic Arrays, VBA), KPI Dashboards
- **Analytics & Statistics:** EDA, Statistical Analysis, A/B Testing, Data Cleaning & Validation, Root Cause Analysis, Trend & Revenue Analytics
- **ML & Tools:** Predictive Modeling (Classification, Regression), Feature Engineering, Scikit-learn, Jupyter Notebooks, Git, GitLab

INTERNSHIP & TRAINING

Data Analytics Trainee

Jun 2025 – Nov 2025

Digital Edify Institute, Hyderabad, India

- Applied training through a hands-on project, cleaning and transforming raw transactional data in Python (Pandas, NumPy) by handling missing values, duplicates, and outliers.
- Wrote SQL in MySQL and PostgreSQL using joins, CTEs, and window functions to extract, aggregate, and validate business metrics from relational tables.
- Built an interactive Power BI dashboard with DAX measures and Power Query transformations to track KPIs and performance trends.
- Performed EDA with Matplotlib to uncover trends and anomalies, summarizing findings as clear, actionable business recommendations.

Data Analytics Intern

Sep 2025 – Dec 2025

Unified Mentor Pvt. Ltd. (Remote), Gurgaon, India

- Collected, cleaned, and validated 5,000+ records using Excel and SQL, maintaining 99%+ data accuracy under defined SLAs.
- Designed and maintained interactive Power BI dashboards for weekly stakeholder reporting, tracking operational KPIs and performance trends.
- Automated recurring reporting calculations using DAX and Power Query, reducing manual effort and turnaround time by 30%.
- Conducted EDA on transactional datasets to detect anomalies, process gaps, and actionable business trends.

PROJECTS

Ride Demand & Revenue Analytics | SQL, Python, Power BI | [GitLab](#)

Aug 2025

- Engineered a two-stage MySQL deduplication pipeline on 35,000+ ride records; used CTEs and LAG () to isolate the 5–7 PM peak window, concentrating 31.2% of daily ride volume.
- Identified airport trips drive 54.8% of total revenue from 39.6% of trip volume; built Power BI KPI dashboards for revenue and route demand monitoring.
- Built a predictive fare model (Random Forest Regressor, Scikit-learn) evaluated via RMSE and R^2 , capturing non-linear interactions across vehicle tiers and pickup zones.

Supply Chain Logistics & Inventory Optimization | Python, SQL, Excel, Power BI | [GitLab](#)

Nov 2025

- Analyzed 7,991 orders across 47 SKUs (\$82.7M revenue, \$30.9M profit) to evaluate fulfillment delays across 6 regional warehouses.
- ANOVA-style variance decomposition proved only 0.08% of delivery-time variance between warehouses, redirecting recommendation to upstream dispatch.
- ABC classification identified 78.7% of revenue in A-tier SKUs; built Excel & Power BI dashboards for executive inventory KPI tracking.

EDUCATION

Gondwana University (Sardar Patel Mahavidyalaya, Chandrapur)

Jul 2022 – May 2025

Bachelor of Science in Information Technology – CGPA: 7.26/10

Maharashtra, India
