

ANSH THAKUR

Data Analyst | Python | SQL | Power BI | Excel

Chandrapur, Maharashtra, India | 9665895546 | [LinkedIn](#) | [GitLab](#) | [Portfolio](#) | [Email](#)

PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in Python, SQL, Power BI, and Excel across a Data Analytics internship and two end-to-end analytics projects. Skilled in data cleaning, validation, exploratory analysis, KPI reporting, and business intelligence dashboards — turning raw datasets into clear, actionable business insights, including findings that say what not to do.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, MySQL

BI & Visualization: Power BI (DAX, Power Query), Excel (Pivot Tables, Charts), Matplotlib, Seaborn, Plotly

Data Libraries: Pandas, NumPy, Scikit-learn

Developer Tools: Jupyter Notebook, Google Colab, Git, GitLab

Analytical: Data Cleaning, Data Validation, EDA, Statistical Analysis, KPI Reporting, Business Intelligence, Data Visualization, Business Understanding, Problem Solving

EXPERIENCE

Data Analytics Intern | Unified Mentor Pvt. Ltd. Sep 2025 – Dec 2025

- Performed data cleaning, transformation, and validation on large datasets using Python (Pandas) and Excel.
- Built automated reporting workflows and KPI dashboards for business stakeholders.
- Applied SQL for data extraction, multi-table joins, subqueries, and window functions.
- Developed Power BI dashboards with DAX measures for executive reporting.

PROJECTS

Supply Chain Performance Analysis

Sep 2025

- Analyzed 7,991 orders across 47 SKUs with Python, Pandas, and MySQL, engineering delivery and margin metrics (\$82.7M revenue, \$30.9M profit).
- Proved late delivery is systemic — only 0.08% of delivery-time variance is between warehouses — preventing a misdirected per-site fix.
- Segmented the catalogue with ABC classification and built an automated interactive Excel dashboard for stakeholder filtering.

Uber Trip Demand Analysis

Aug 2025

- Analyzed 35,000 trip records in MySQL and Python, profiling demand timing, fares, revenue, and vehicle economics across hours, zones, and airport trips.
- Quantified peak demand (5–7 PM carries 31.2% of trips) and airport economics (39.6% of volume, 54.8% of revenue) to guide surge pricing and fleet allocation.
- Benchmarked fare and vehicle economics (premium earns 2.8× more per km) and built Power BI and Excel dashboards for KPI monitoring.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) | CGPA: 7.26/10 2022 – 2025

Sardar Patel Mahavidyalaya, Chandrapur — Gondwana University, Maharashtra

Professional Training: Data Science & Analytics Jun 2025 – Nov 2025

Digital Edify Institute, Hyderabad

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation — Forage
- Tata GenAI Powered Data Analytics Job Simulation — Forage
- British Airways Data Science Job Simulation — Forage
