PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in data analysis, anomaly and pattern detection, and data validation through a Data Analytics internship and multiple analytics projects. Skilled in deep-dive analysis on large, complex datasets using SQL and Python, identifying defects and high-impact opportunities, and translating findings into clear insights via Power BI and Excel dashboards. Strong attention to detail and documentation discipline, able to work accurately within defined policies, SOPs, and timelines in fast-paced, shift-based environments.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Visualization & BI: Power BI (DAX, Power Query, Data Modelling), Excel (Pivot Tables, VLOOKUP, Conditional Formatting, Charts), Tableau

Data Analysis: Data Cleaning, Data Preprocessing, Data Wrangling, Exploratory Data Analysis, Statistical Analysis, Anomaly Detection

Databases: MySQL (Joins, Subqueries, Aggregate Functions, Views)

Developer Tools: VS Code, Jupyter Notebook, Google Colab

Version Control: Git, GitLab

DATA ANALYSIS SKILLS

Large Dataset Analysis, Anomaly & Pattern Detection, Data Validation, Data Quality Checks, SQL Querying, Exploratory Data Analysis, Root Cause Analysis, Trend & Insight Generation, Technical Documentation, Attention to Detail, Process & SOP Adherence, Analytical Problem Solving, Cross-functional Collaboration.

INTERNSHIP EXPERIENCE

Data Analytics Intern | Unified Mentor Pvt. Ltd. Sep 2025 - Dec 2025

- Performed data cleaning, transformation, and validation on large datasets using Python (Pandas) and Excel, identifying anomalies and inconsistencies and resolving them to defined data quality standards.
- Wrote SQL queries (joins, subqueries, aggregate functions) to extract, cross-check, and validate data across multiple sources at high accuracy.
- Built Power BI dashboards and visualizations for KPI monitoring, turning raw data into clear, actionable insights for stakeholders.
- Conducted exploratory data analysis to detect trends and outliers, and documented findings following defined reporting standards and timelines.

TECHNICAL PROJECTS

Ride Operations & Revenue Analytics | [GitLab](#)

Aug 2025

- Analyzed 35,000 trip records using SQL and Python to detect anomalies, identify peak demand periods, and surface operational trends.
- Built interactive Power BI dashboards for KPI monitoring, fare distribution analysis, and revenue trend visualization.
- Identified high-revenue segments through pattern detection — airport trips drive 39.6% of volume but 54.8% of revenue, and premium vehicles earn 2.8× more per km — informing surge-pricing and fleet allocation recommendations.

Supply Chain Performance Analysis | [GitLab](#)

Sep 2025

- Analyzed 7,991 orders across 47 SKUs using Python, Pandas, and SQL to identify operational inefficiencies, delivery anomalies, and inventory trends.
- Performed data cleaning, validation, and exploratory data analysis to detect overstock, understock, and shipping-performance outliers.
- Built dashboards and visual reports to communicate high-impact findings and support data-driven decision-making.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) | CGPA: 7.26/10 Jul 2022 - May 2025

Gondwana University, Maharashtra

Professional Training: Data Science & Analytics Jun 2025 - Nov 2025

Digital Edify Institute, Hyderabad, Telangana

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation | [Certificate](#) — Jun 2025
- TATA GenAI-Powered Data Analytics Job Simulation | [Certificate](#) — Jul 2025
- British Airways Data Science Job Simulation | [Certificate](#) — Aug 2025
