

ANSH THAKUR

Chandrapur, Maharashtra, India | 9665895546 | ansht1194@gmail.com | [LinkedIn](#) | [GitLab](#)

PROFESSIONAL SUMMARY

MCA final-year candidate (Class of 2027) and B.Sc. IT graduate (2025, 7.26 CGPA) with hands-on experience in data analysis, reporting, business intelligence, and operational analytics through a Data Analytics internship and end-to-end projects. Skilled in Advanced Excel, Power BI, SQL, and Python - with practical experience in data collection, cleaning, validation, and exploratory analysis, building interactive dashboards, automating recurring reports, and monitoring KPIs for stakeholder decision-making. Working knowledge of machine learning (classification, regression, RFM churn modelling). Strong analytical and communication skills suited to structured, deadline-driven environments. Available for internships in Hyderabad or remote.

EDUCATION

Master of Computer Applications (MCA) - Expected Graduation: 2027 (Final Year)

[MCA College / University - to be added]

Bachelor of Science in Information Technology (B.Sc. IT) - 7.26 CGPA | Jul 2022 - May 2025

Sardar Patel Mahavidyalaya, Chandrapur | Gondwana University, Maharashtra

Professional Training: Data Science & Analytics | Jun 2025 - Nov 2025

Digital Edify Institute, Hyderabad, Telangana

CORE COMPETENCIES

Data Analysis & MIS Reporting | Advanced Excel | Dashboard Development & Reporting Automation | Business Intelligence | KPI Monitoring | Deep-Dive Analysis | Anomaly & Pattern Detection | Root Cause Analysis | Quality Assurance | Reproducible Analysis (SQL/Python) | Stakeholder Communication

TECHNICAL SKILLS

Business Intelligence & Tools: Power BI (DAX, Power Query, Data Modelling), Microsoft Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, Dynamic Arrays, VLOOKUP, VBA), Jupyter, Git/GitLab

Programming & Databases: SQL (MySQL, Joins, Subqueries, Window Functions, CTEs), Python (Pandas, NumPy, Scikit-learn)

Data Analysis & Reporting: Data Cleaning, Data Validation, EDA, Pattern Identification, KPI Monitoring, Operational Reporting

Quality & Process: Quality Standards, SOP Interpretation, Root Cause Analysis, Documentation, Process Improvement, SLA Adherence

EXPERIENCE

Data Analytics Intern | Unified Mentor Pvt. Ltd. | Sep 2025 - Dec 2025

- Performed data collection, cleaning, validation, and high-accuracy quality checks on 5,000+ records using Excel and SQL, executing within defined timelines and SLAs while adhering strictly to documented quality standards.
- Built and maintained Power BI dashboards for weekly stakeholder reporting, supporting KPI monitoring and business performance tracking.
- Automated recurring reporting calculations using DAX and Power Query, reducing manual effort and improving reporting turnaround time.
- Conducted deep-dive exploratory data analysis on large datasets to identify anomalies, trends, and disruptions, translating findings into actionable insights for stakeholder review.

PROJECTS

Customer Churn Prediction & Retention Analytics | Sep 2025

- Analyzed 25,000+ customer records using RFM segmentation and Random Forest, achieving 78% accuracy and identifying INR 387M revenue at risk; built a Power BI dashboard tracking churn risk by segment.
- Insights enabled an 18% reduction in customer churn through targeted retention strategies.

Uber Mobility Demand & Revenue Analytics [Project Link] | Aug 2025

- Built a two-stage MySQL deduplication pipeline and analyzed 35,000+ trip records using SQL and Python to separate peak demand volume from peak growth.
- Found 31.2% of demand concentrated in the 5-7 PM window and that airport trips drive 54.8% of total revenue from just 39.6% of trip volume; built Power BI dashboards for KPI monitoring and revenue-trend visualization.

Supply Chain Operations & Inventory Analytics [Project Link] | Sep 2025

- Analyzed 7,991 orders across 47 SKUs (\$82.7M revenue, \$30.9M profit) using Python and SQL to test whether late deliveries were caused by one warehouse or were network-wide.
- Decomposed delivery-time variance and found only 0.08% variance between warehouses, ruling out a costly per-site fix and redirecting the recommendation to the upstream dispatch process.
- Ran ABC classification across the SKU catalogue, finding 78.7% of revenue concentrated in A-tier SKUs; built Excel dashboards with pivot tables for logistics and inventory reporting.
