PROFESSIONAL SUMMARY

B.Sc. Information Technology graduate and Data Analyst with practical internship and training experience in data cleaning, exploratory data analysis (EDA), and executive reporting. Proficient in SQL, Python (Pandas, NumPy), Power BI (DAX, Power Query), and Advanced Excel. Experienced in querying relational databases, designing interactive KPI dashboards, and translating business metrics into actionable operational insights.

TECHNICAL SKILLS

- **Programming & Databases:** SQL (MySQL, PostgreSQL, Joins, CTEs, Window Functions), Python (Pandas, NumPy, Matplotlib), Relational Databases (RDBMS)
- **BI & Visualization:** Microsoft Power BI (DAX, Power Query, Star Schema), Advanced Excel (Pivot Tables, XLOOKUP, Dynamic Arrays, VBA), KPI Dashboards
- **Core Analytics:** Exploratory Data Analysis (EDA), Data Cleaning & Validation, Root Cause Analysis, Trend Analysis, Operational & Revenue Analytics
- **Tools & Frameworks:** Jupyter Notebooks, Git, GitLab, Scikit-learn (Basic Classification, Regression & Feature Engineering)

TRAINING & INTERNSHIP

- Data Analytics Intern** | *Unified Mentor Pvt. Ltd., Gurgaon, India* **Sep 2025 – Dec 2025**
- Collected, cleaned, and validated 5,000+ transactional records using Excel and SQL, sustaining 99%+ accuracy under strict SLAs.
 - Designed interactive Power BI dashboards for weekly stakeholder reporting, tracking operational KPIs and performance trends.
 - Automated recurring reporting calculations using DAX and Power Query, reducing manual report turnaround time by 30%.
- Data Analytics Trainee** | *Digital Edify Institute, Hyderabad, India* **Jun 2025 – Nov 2025**
- Completed hands-on training in SQL query optimization, Python data wrangling (Pandas, NumPy), RDBMS, and Power BI dashboards.
 - Executed structured data validation, error handling, and recurring MIS report generation on enterprise datasets using Jupyter and Git.

PROJECTS

- Supply Chain Operations & Inventory Analytics** | *Python, SQL, Excel, Power BI* [\[GitLab\]](#) **Nov 2025**
- Analyzed 7,991 orders across 47 SKUs (\$82.7M revenue) using Python and SQL; ruled out warehouse-specific delays by showing variance was just 0.08%.
 - Performed ABC inventory classification identifying 78.7% revenue concentrated in A-tier SKUs; built Excel & Power BI dashboards for KPI tracking.
- Subscription Retention Analytics — Churn & Revenue-at-Risk** | *Python, SQL, Power BI* [\[GitLab\]](#) **Dec 2025**
- Analyzed customer subscription records with SQL and Python to identify churn drivers and model customer risk tiers using Scikit-learn.
 - Developed an interactive Power BI dashboard tracking churn probability, customer retention trends, and revenue-at-risk projections.
- Ride Demand & Revenue Analytics** | *SQL, Python, Power BI* [\[GitLab\]](#) **Aug 2025**
- Engineered a MySQL deduplication pipeline on 35,000+ ride records; discovered 31.2% of daily demand concentrates in the 5–7 PM evening peak.
 - Discovered that airport routes generate 54.8% of revenue from only 39.6% of trip volume; built Power BI dashboards for executive monitoring.

EDUCATION

- Gondwana University (Sardar Patel Mahavidyalaya, Chandrapur)** | *Maharashtra, India* **Jul 2022 – May 2025**
- Bachelor of Science in Information Technology (B.Sc. IT) — CGPA: 7.26 / 10

CERTIFICATIONS & INDUSTRY SIMULATIONS

- Deloitte Data Analytics Simulation — Data Discovery, Quality & Dashboard Visualization [\[Certificate\]](#) **Jun 2025**
- TATA GenAI-Powered Data Analytics Simulation — Exploratory Data Analysis & Business Insights [\[Certificate\]](#) **Jul 2025**
- British Airways Data Science Simulation — Predictive Modelling & Operational KPI Metrics [\[Certificate\]](#) **Aug 2025**
